WE ARE HERE

BOOK NOW
Our Clinic
We are a purpose built teaching clinic that delivers high quality, evidenced based services to adults and children, while teaching the next generation of Speech Pathologists. We collaborate with the University of Melbourne to deliver the latest healthcare innovation.

Our private speech pathology practice offers two streams:
1. Clinician-led adult and paediatric services with highly experienced speech pathologists.
2. Clinician and student-led adult and paediatric services. Fees are set at a reduced rate to reflect the clinical teaching component.

Our Team
We are a team of compassionate, highly experienced, and innovative speech pathologists. We are committed to offering person-centered assessment and care for adults and children in the areas of communication and swallowing.

Our Location
We are located on Level 1/723 Swanston St Carlton and co-located with the Melbourne Dental Clinic.

Our Clients
We see plan or self-managed NDIS clients, clients with Medicare plans (Chronic Disease Management Program), clients with Aged Care, DVA, and TAC funding packages, privately funded clients, and those with private health insurance (but this needs to be clarified by each client prior to booking).

We also run informational programs/workshops for families, healthcare and educational professionals; and offer speech pathology services to corporate clients (e.g. professional voice users).

Who We Help

ADULTS
We support adults with a range of conditions including: Autism Spectrum Disorders, Intellectual Disability; neurological conditions (e.g. stroke, Parkinson's Disease, dementia), and many more.

Examples of areas that we work in include:
• language (aphasia- including reading, writing, understanding and speaking) and cognitive communication difficulties
• dyspraxia (sensory-motor speech problems)
• dysarthria (slurred speech)
• voice (including gender affirming voice therapy)
• stuttering
• alternative and augmentative communication (AAC)
• oropharyngeal dysphagia (swallowing difficulties).

CHILDREN
Our paediatric speech pathologists work with children with conditions including: global developmental delay, developmental language disorders, Autism Spectrum Disorder; Attention Deficit Disorder; Intellectual disability, Specific learning difficulties (e.g. dyslexia), and many more.

Examples of areas that we work in include:
• speech
• language
• literacy
• voice
• fluency,
• alternative and augmentative communication.
